

ENERGY EFFICIENT RETROFIT EXAMPLES

As part of the Retrofit Package your Home Sustainability Assessor will conduct a full retrofit assessment of your home. You will then be provided with a Retrofit Assessment report which identifies and prioritises a number of energy efficient heating and cooling options for your home.

INSULATION	Walls
	Floors
	Ceilings
	Other
VENTILATION	Walls, Roofspace
	Windows
	Other
DRAFT SEALING	Doors
	Windows
	Gaps/Cracks
	Exhaust Fans
	Other
WINDOW APPLICATIONS	Window Reflective Films
	Curtains
	Pelmets
	Double Glazing
	Double Glazing-style films
	Other
EXTERNAL SHADING	Outside Awnings/Blinds
	Pergolas
	Other
LIGHTING	Replacement of inefficient halogen lights
	Replacement of inefficient incandescent lights
	Replace external spot lighting with more efficient options
	Other
HOT WATER	Upgrade your hot water system from electric to gas
	Improve hot water temperature setting
	Install pipe insulation (lagging)
	Flow restrictors for taps
	Low Flow Shower heads
ENERGY SAVING APPLIANCES	Other
	Replace electric (bar, oil or slab) heater with gas heating or other energy efficient heating methods (ie solar passive, wood etc)
	Replace electric heating with gas
	5 Star Fridge
	Dishwasher (min. 3.5 Star)
	Energy efficient air conditioner
	Powerboards
	Other
