

Solutions for sustainable living

Solar electricity

– available with the Central Victoria Solar City Electricity Package

Capture the power of the sun with solar electricity

Solar electricity systems generate clean electricity using the sun's light. Installing a solar electricity system is not only an investment for the future, you'll also be helping to transition to a low carbon economy.

Solar power on demand

One of the most common misconceptions about solar energy is that you won't generate power on a cloudy day. But it doesn't have to be sunny or even warm for your solar panels to work, as it's light, not heat, that generates the electricity. So as long as there's daylight, even with cloud cover or on cooler days, your solar panels are still quietly producing clean energy.

A fully installed solution that's right for you

For complete peace-of-mind, we install only the highest quality solar systems, all backed by a 25 year warranty on your Sharp solar panels. We also arrange everything from start to finish, including connection to the grid by an accredited installer. Plus, as a leading energy retailer with many years of experience in providing solar solutions to our customers – you can be rest assured we're here for the long term.

Pay just 20% upfront* and the remainder over 2 years

With our interest free payment plan*, going solar is now even more affordable.

Together we can make a difference.™

Turn sunshine into gold

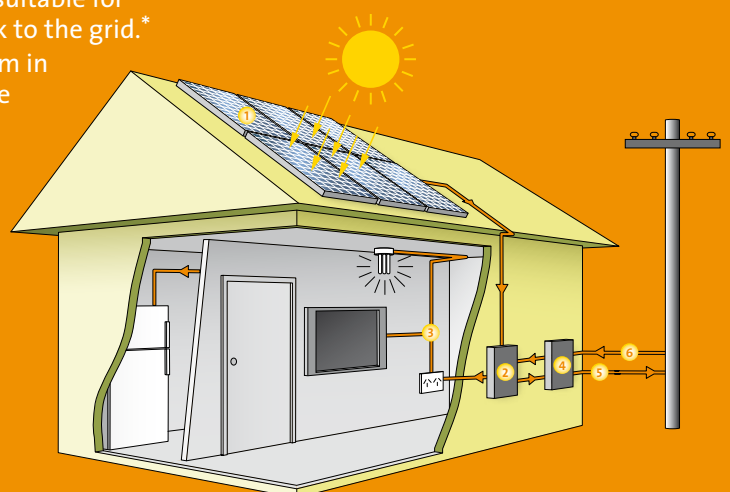

How does my solar electricity system work?^

1. Solar photovoltaic panels produce DC power.
2. Your inverter converts the solar DC power to AC power, suitable for your household needs. Any excess generation is fed back to the grid.*
3. You first use the electricity produced by your solar system in your home, with any additional power supplied from the electricity grid.
4. Your meter measures your imported and exported electricity.
5. Any excess electricity produced over and above what you first use in your home is exported back to the grid.
6. When your electricity demand exceeds your solar generation, electricity will be imported from the grid.

The only changes you'll notice are the modern looking and unobtrusive panels on your roof, a discreetly mounted box (your inverter) and a new meter.

^This example shows a net metered installation.

*Additional charges may apply for meter change over.

Be rewarded with feed-in tariffs

Feed-in tariffs reward you for the surplus electricity your system feeds back into the grid. One of Australia's most generous, Victoria's feed-in tariff is 60c/kWh for customers with net metered systems up to 5kW. This feed-in tariff is guaranteed until January 2024. Plus, Origin offers its electricity customers an extra 6c/kWh[∞], a total feed-in tariff of 66c/kWh. Central Victoria Solar City customers also have access to an additional feed-in tariff, while you remain with the project, or until it ends in June 2013. Visit www.centralvictoriasolarcity.com.au for additional information.

Central Victoria Solar City special offer – 10% off

2kW solar electricity system fully installed

- fully installed and grid connected, 12 solar panels
- 20m² unshaded north facing roof required

Prices for a pitched roof

Distance from Ballarat/Bendigo	Price	- 10% discount	=	You pay
Rec Zone 3 and 4				
0 - 100km	\$7,590	- \$759*	=	\$6,831 [^]
Rec Zone 3				
100 - 300km	\$8,390	- \$839*	=	\$7,551 [^]

Rec Zone 3 and 4

0 - 100km	\$7,590	- \$759*	=	\$6,831 [^]

Payment plan

Upfront payment	Monthly payment
\$1,366.20 ^{^+}	\$227.70 [^]
\$1,510.20 ^{^+}	\$251.70 [^]

Simply quote promotional code **CVSC** to take advantage of this great offer.

The benefits of solar electricity

- ✓ Access two feed-in tariffs through the Central Victoria Solar City Project.
- ✓ 25 year manufacturer's warranty on your Sharp solar panels.
- ✓ It could save money on your energy bills year in, year out.
- ✓ Add value to your home

For more information or to obtain a quote call **1300 791 468**

and quote the promotional code **CVSC** or visit

originenergy.com.au/solar and enter the code when prompted.

Once you receive your Origin quote, complete and mail the Central Victoria Solar City engagement contract and begin the process of buying this product and becoming part of the project.

Central Victoria Solar City is part of the Australian Government's \$94 million Solar Cities initiative.
